Assignment Title: Create a Simple Personal Profile Webpage Using HTML

Objective: To practice HTML Structural Tags, Text Formatting, Forms, Tables, Multimedia, Semantic Elements, and Interactive Elements.

Assignment Tasks

Create a simple personal profile webpage using HTML. Your webpage must include the following elements:

1. **Structural Tags**
    - Use `<html>`, `<head>`, `<title>`, and `<body>`.
    - Add a heading and a paragraph about yourself.
2. **Text Formatting**
    - Use bold, italic, underline, and highlighted text.
3. **Form**
    - Create a form with the following fields:
        - Name
        - Email
        - Password
        - Gender (Radio buttons)
        - Hobbies (Checkboxes)
        - Submit button
4. **Table**
    - Create a table showing your academic information.
    - Include at least 3 rows and 3 columns.
5. **Multimedia**
    - Add one image to your webpage.
    - Add an audio or video element.
6. **Semantic Elements**
    - Use `<header>`, `<nav>`, `<main>`, `<section>`, and `<footer>`.
7. **Interactive Elements**
    - Use `<details>` and `<summary>` to display additional information about yourself.
    - Add a clickable button.

Submission Requirements

- Submit your assignment through **GitHub**.
- Create a GitHub repository for your assignment.
- Upload your `index.html` file to the repository.
